/// About Antunes

At Antunes, we've been helping our customers achieve success for more than 65 years. From our headquarters in Carol Stream, Illinois, we've grown to become a leading solutions provider of countertop cooking equipment and water filtration systems for the global foodservice market.

We manufacture innovative products of the highest quality, backed by our team of industry experts and our commitment to personal service. In fact, every piece of Antunes equipment is designed with your operational needs and menu versatility in mind. It's all about providing the right solution for you.

We're proud to be family-owned and operated with two generations currently working inside the company. It's what sets us apart — and it's what inspires us to build lasting partnerships that drive success for our customers.

To learn more about Antunes and our products, call +1.630.784.1000 or visit us online at antunes.com.

/// “Whether you already use our equipment or this is your first look at our products, my family and I invite you to explore all that Antunes has to offer — the result of more than 65 years of excellence and innovation.”

- Glenn Bullock, CEO

/// Cooking Solutions

From the largest, most successful chains to small, regional businesses, operators choose Antunes because of our steadfast commitment to providing innovative equipment solutions known for quality, performance, and reliability.

We offer a wide variety of plug-and-play ventless countertop cooking solutions designed with versatility in mind. With Antunes, you can maximize valuable kitchen space, increase throughput and utilize labor more effectively. That’s why our name is trusted in thousands of kitchens around the globe.

/// Water Treatment Solutions

Water is your most critical ingredient. It can significantly affect the taste and texture of food and beverages and impact equipment performance, making water quality an important factor for every operator to consider. That’s why Antunes offers a lineup of water treatment solutions to fit any application, ensuring you’re always serving your best.

Antunes offers a comprehensive suite of water treatment solutions to address the most common and problematic water issues, such as unpleasant taste, odor, sediment and scale — allowing operations of all sizes to focus on consistently serving great food and beverages.

/// Toasting

With Antunes, it's easier than ever to achieve superior quality with all your toasted menu items — fast. Whether it's radiant or contact toasting, our high-volume designs deliver consistency, speed and reliability — helping your operation stay profitable and always on the competitive edge. When it comes to your customers' favorites, you can count on Antunes' toasting solutions to get the job done.

Why Toasted Tastes Better

Did you know that bread actually goes through a chemical reaction during toasting? This process, known as the Maillard reaction, forms browning as amino acids and sugar react together. This creates new aroma — and flavor-producing molecules — giving items that delicious, golden-brown toasted taste we all love.

Contact vs. Radiant Toasting: What's the Difference?

Contact toasting makes complete contact between the heat source and the food product. Restaurants often use this method for its consistency as well as the sealed layer it creates, protecting the soft interior of the bread. This toasting method is ideal for items like sandwich buns: the sear from contact toasting locks in condiments, preventing sogginess and ensuring every bite is delicious.

Radiant toasting extracts the moisture from the bread. The process of drying up the moisture within the bread is what causes it to turn golden brown. This toasting method is especially appropriate for items like English muffins, bagels and croissants.

Toast a Variety of Different Items

Buns

Sliced bread

Texas toast

Tortillas

Flatbreads

Pitas

Naan

/// Vertical Contact Toasters Models VCT-25 and VCT-50

Evenly toast the cut sides of buns with the Vertical Contact Toaster. The VCT-25 and VCT-50 models feature a dual-sided platen for additional capacity compared to other toasters, separate compression settings for the heel and crown, and a dial thermostat for making quick adjustments to the quality of the toast. These units are all constructed of stainless steel for long life and include three release sheets (unless otherwise noted).

/// Vertical Contact Toasters Model VCT-2000

Evenly toast the cut sides of buns with the Vertical Contact Toaster. The VCT-2000 features separate compression settings for the heel and crown and a digital controller for making precise adjustments to the quality of the toast. Its built-in auxiliary heater warms the top sides of the buns to help keep the assembled sandwich warmer for longer. This model also includes belt wraps to minimize bun marking. Each unit includes three release sheets (unless otherwise noted).

Mini Vertical Contact Toaster Model VCT-2

With the smallest footprint of our entire line of Vertical Contact Toasters, the VCT-2 is the perfect fit for any operation where space is limited. It toasts two buns (heel and crown) simultaneously and features individual heel and crown compression settings that allow operations to easily adjust toast quality. Each unit includes two release sheets.

VCT-2 (with belt wraps)

Model & Mfg. No.	Capacity	Approvals	Plug	Volts	Watts	Amps	Hz.	Width	Depth	Height	Shipping Weight

Mini Vertical Contact Toaster Model VCTM-2

The VCTM features a small footprint while toasting two buns (heel and crown) simultaneously. It includes a variable speed motor as well as individual heel and crown compression settings so operations can easily adjust toast quality. Models are also available with a mechanical butter wheel to add flavor to the toasted product or an auxiliary heater to drive additional heat into the buns.

/// Gold Standard Toaster Models GST-2V, GST-3V, GST-5V, GST-2H

The Gold Standard Toaster features an innovative and unique toasting system that provides operations with quality, reliability, and consistency in their toasting platform. The GST model utilizes dual-belt technology that cradles buns as they move along the heat source, eliminating bun defects such as sticking, slipping, and bun marking. The belts are continuously moving so operators can immediately load product. The energy-efficient design keeps the heat locked inside the toaster to provide significant energy savings compared to other models.

/// Steamers

Antunes steamers deliver fresher taste, more appetizing presentation and higher nutritional value — all in far less time than with traditional cooking methods. Steaming is the perfect way to quickly and evenly melt cheese, or prepare popular items like seafood, pasta, vegetables and more. Our innovative steaming technology makes it easy to heat foods quickly without leaving residual water behind, thanks to lower condensation levels.

A Smarter Alternative to Microwaves

Steamers offer a better way to prepare a variety of foods compared with microwave cooking. Unlike microwaves, steamers prevent the degradation of food's texture and nutritional content while enhancing color and flavor.

Steam a Variety of Different Items

Pasta
Soup
Eggs
Leafy greens
Chicken
Asparagus
Beef
Mussels
Green beans
Broccoli
Carrots
Pork ribs
Clams
Dim sum
Fish
Macaroni
Potstickers
Shrimp
Tofu
Squash
Crab legs
Falafel
Steak strips
Baked goods
And more!

/// Rapid Steamer

Build a bigger, more complete menu with just a single piece of equipment—the Rapid Steamer by Antunes. This unit converts plain tap water into steam so foods keep their original textures, colors, flavors, and nutrients. The end result: food that looks fresher and tastes better, from vegetables and seafood to pasta, proteins, and more.

The Rapid Steamer's consistent steaming process removes the guesswork and produces a uniform finish from one operator to the next. Intelligent programming automatically adjusts steam introduced to the chamber for ideal steaming in every cycle.

The Rapid Steamer features a touchscreen interface for quickly preparing items. With an instant steaming button as well as preprogrammed favorites, this easy-to-use unit can handle a variety of different menu items without causing any delays in service. The included USB connection allows operations to easily load new recipes to handle new and expanding menus.

The Rapid Steamer gives you the freedom to create with confidence.

Versatile Performance

Rapidly steam everything from pasta to seafood, vegetables, meat, and more, from one platform.

Streamlined Efficiency

Decrease cook times and increase throughput while bringing out the true flavors of your cuisine.

Intelligent Programming

Just set the steam time and let the RS-1000 automatically optimize steaming performance.

Easy Operation

Steam with a single press of the user-friendly touchscreen and quickly program your custom menu with ease.

Compact Footprint

Combine this compact solution with your kitchen for outstanding, space-saving steaming capabilities.

/// DFW Dim Sum Accessory

The Deluxe Food Warmer's new Dim Sum Accessory pairs steaming precision with the versatility and speed of high-performance engineering. Ideal for achieving the perfect steam in a compact footprint for multiple menu items, the Dim Sum Accessory offers foodservice operators a ventless, efficient method of preparing everything from dim sum, dumplings, and bao to seafood, vegetables, rice, and proteins in mere minutes.

Operators can select any variety of dim sum containers between 4½ and 5½ inches (11.4 and 14 cm) in diameter to easily create their own plug-and-play dim sum steaming platform in minutes. (Dim sum containers are not included with the DFW Dim Sum Accessory.)

With precise, high-performance steaming available at the press of a button, the Dim Sum Accessory makes it easier than ever to expand menus while saving space.

See pages 18-19 for more information on the Deluxe Food Warmer.

SMS-200 Stacking Rack	9900005	Rack to stack two units to save space and improve access. Organizes utility lines, protects water pressure regulators, and collects water to single drain hose. 22 1/8" (562 mm) width x 16 1/2" (419 mm) depth x 25 1/2" (648 mm) height.	MS-150, MS-155, MS-250 & MS-255
Single Water Pressure Regulator Kit	7000314	Water pressure regulator assembly for use with one steamer.	All MS models
Dual Water Pressure Regulator Kit	7000235	Water pressure regulator assembly for use with two steamers.	All MS models

/// Deluxe Food Warmers Models DFW-100, DFW-150, DFW-200, DFW-250, DFWT-100, DFWT-150, DFWT-200, DFWT-250, DFWF-250

The Deluxe Food Warmer prepares food quickly using simple push-button action. Units with timers can be set up to 99 minutes. Units with direct water hook-up include an installation hose kit but do require a water pressure regulator (see Water Pressure Regulators, page 14) to keep between 20 psi (1.38 bar) and 30 psi (2.07 bar).

No timer with self-contained water tank

/// Grilling

Antunes grilling equipment is the perfect way to cook, warm and even display customers' favorites. Our easy-to-use egg stations are renowned for their consistency, flexibility and versatility, making it quick and simple to serve up moist, delicious scrambles and omelets in minutes. Antunes grilling technology is also perfect for searing paninis — and with our legendary corrals, you can serve delicious hot dogs that baste and cook in their own juices, making them an ideal solution for high-volume operations.

More Space, More Options

Antunes grilling solutions help free up valuable grill space by providing dedicated stations for preparing a variety of menu items. Our ventless grilling technology means there's no expensive hood required, while our plug-and-play functionality makes it easy to fit any kitchen workflow.

Grill or Warm a Variety of Different Items

Eggs

Hot dogs

Plant-based burgers/patties

Bread pudding

Crab cakes

Paninis

/// Egg Station Mini

The Egg Station Mini makes it easy for operators to quickly serve fresh, made-to-order eggs in any daypart. With a footprint smaller than any other available Egg Station and interchangeable egg rack configurations, this ventless unit allows operators to move eggs, omelets and scrambles and other menu items off the grill while requiring very little additional space in the kitchen.

- Cooking time is approximately 120 seconds for room temperature eggs and 150 seconds for refrigerated eggs.
- Eliminates potential for cross-contamination by moving eggs and other food items off the grill.
- Plugs into basic electrical outlets for easy movement to any kitchen countertop.

EGG RACK CONFIGURATIONS

The base unit features an easily interchangeable rack and cover assembly for round eggs or omelets. The Egg Station Mini is available with a rack and cover kit for compact presentation (six 3" eggs or a single 8" omelet), which can also be used for scrambles. ESM egg racks are sold separately, except 9300647.

How could you use dedicated grill space in your kitchen?

With the Egg Station Mini, you can add grill space to your kitchen — preventing the chance of cross-contamination, streamlining your workflow, or freeing up room for even more menu items. What types of offerings could you incorporate with this extra space? Consider on-trend items like plant-based burgers, or other customer favorites like crab cakes, crepes, and more.

/// Egg Stations Models ES-600, ES-602, ES-604, ES-800, ES-1200

The Egg Station takes the guesswork out of preparing freshly cooked eggs by making the process consistent from start to finish. With the Egg Station, operations can eliminate the risk of cross-contamination by providing a dedicated area for eggs, and can also free up valuable grill space. Multiple configurations are available, and each unit includes egg rings and a spatula, scraper, plastic bottle, and brush.

/// Egg Stations with Dual Zone Model ESDZ-1200

Easily serve freshly cooked egg-based menu items to customers throughout the day with the Egg Station with Dual Zone. The ESDZ-1200 features two independent cooking zones that allow operations to easily and quickly prepare eggs throughout the day, whether it's four eggs, two eggs, or even an individual order. Each unit features a two-channel timer that includes four pre-programmed cook times to handle a variety of products.

Hot Dog Corrals Models HDC-20, HDC-20RC, HDC-21A, HDC-30A, HDC-35A, HDC-50A

The Hot Dog Corral sears in the natural flavor of hot dogs by basting them in their own juices as they roll along the heated grill surface. The adjustable thermostat makes it easy to maintain the grill temperature to ensure products taste fresh and delicious for up to six hours. It has only one moving part for quick cleanup.

/// Merchandising

Our stylish cases, cabinets and cookers are designed to help you showcase customer favorites at the ideal serving temperature. Our display cases make it easy to offer everything from baked goods to ready-to-serve meals. For warm items, our heated display cabinets are ideal for freshly cooked chicken and grab-and-go meals. You'll also find a variety of item-specific designs like our corn cookers and soup warmers.

Generate More Impulse Buys

By making profitable, appetizing food items easily accessible for customers, you can boost your sales — all while keeping items safe and ready to eat at the right temperature.

/// Display Cases Models DC-12C, DC-14A, DC-14R, DC-27L

The new line of Display Cases is perfect for showcasing baked goods. Each design includes acrylic panels to provide full visibility to the products inside. With numerous configurations available — all with a small footprint — they can be easily integrated into the any restaurant operation at the point of sale.

/// Timers

Our lineup of multi-channel timers helps operators organize kitchen tasks and bring precision to the order preparation process. We also offer hand wash timers that make it easy to maintain the highest standards of hygiene by reminding staff of regular handwashing intervals. Our timers are battery and solar powered, saving operators the need for extra power outlets.

/// Solar Powered Timers Models TTS-4, TTS-8

Easy to program and maintain, these timers mount to any magnetic surface. Multiple channels allow for accurate timing when cooking, baking, or food holding to ensure product consistency. Separate audible and visual signals indicate when timing is complete. Includes a 90-day warranty.

TTS-8

Model & Mfg. No.	Description	Number of Channels	Width	Depth	Height	Shipping Weight
TTS-4 9900624	Solar powered and 3 AA Alkaline batteries included.	4	10" (254 mm)	2 1/8" (54 mm)	6 1/8" (156 mm)	4 lbs. (1.8 kg)
TTS-4 9900625	Solar powered and 3 AA Alkaline batteries included. Mounting bracket included.	4	10" (254 mm)	2 1/8" (54 mm)	6 1/8" (156 mm)	4 lbs. (1.8 kg)

/// Hand Wash Timer Model HWT-20

This twenty-second hand-washing timer acts as a visual tool to help employees conform to health and safety requirements. Requires no user intervention to operate or activate the process. Mounts to any magnetic surface. Includes a 90-day warranty.

HWT-20

Model & Mfg. No.	Electrical	Cycle Time	Width	Depth	Height	Shipping Weight
HWT-20 9900640	Two AA batteries with an estimated operating life of 3 years.	20 seconds	6" (152 mm)	1 1/4" (32 mm)	4" (102 mm)	1 lb. (0.5 kg)

/// Cup Dispensing

Our dispensing equipment keeps cups and containers organized and easily accessible until they're ready for use.

/// Dial-A-Cup Models LS-20, LS-30, DACS-20, DACS-30, DACS-35, DACS-40, DACS-50, DACS-60, SSDAC-5, SSDAC-10, DAC-5, DAC-10

Dial-A-Cup is an innovative way to dispense almost all standard beverage cups. The one-size-fits-all concept allows the operator to change styles without worrying about how new cups will fit in the dispenser. Units can be mounted vertically, horizontally, or overhead. All DACS and LS units include a 90-day warranty. Due to size regulations, UPS treats the DACS-30 and DACS-35 as if their weight were 70 lbs. (31.75 kg) and the DACS-50 as 105 lbs. (47.6 kg).

*Dispenser is not included with Hand Sanitizer Stands

/// Water Treatment

Water plays a very significant role in the taste of food and beverages. High-quality menu items need high-quality water, making the right water filtration solution a critical part of any operation. Not only is it critical to consider water as the most important ingredient, it's also important to consider how clean, filtered water can keep kitchen appliances running smoothly—preventing maintenance issues and downtime associated with scale and hardness.

Better Water, Better Results

No matter what you serve, your water supply makes a difference. Did you know that water makes up 83% of fountain soda? And when it comes to chefs in the kitchen, they understand how bad taste, color and odor can compromise the entire dish.

That's why it's so important to choose the most effective water filtration solution for your operation, like the VZN system from Antunes. Not only will you ensure the highest levels of water quality for everything you serve, you'll also save time and money with less frequent filter replacements and maintenance.

Eliminate Common Water Issues

Water treatment eliminates several key factors that have a negative effect on water quality:

Particulates/Sediment

Chlorine/Chloramine
(added by municipalities to kill pathogens; creates unpleasant taste and odor)

Total Dissolved Solids
(TDS - dissolved minerals impacting taste and equipment performance)

Cysts
(microorganisms that are unaffected by chlorine; can cause illness)

Scale/Hardness
(buildup can lead to clogged equipment and costly maintenance)

/// A Smart Alternative to Costly Cartridges

The VZN system from Antunes delivers high-quality ingredient water through a two-phase process that utilizes both ultrafiltration and a carbon cartridge. By combining these two critical steps, the VZN system helps operators save time and money with less frequent maintenance — ensuring the lowest cost of ownership for premium water filtration.

Because the ultrafilter delivers only mechanically clean water to the carbon cartridge, the system requires only one low-cost carbon cartridge change per year rather than multiple times per year, like many competitive products.

Having fewer cartridges in the system reduces the overall cost for operators. In fact, over time — often in less than 18 months — the savings from using fewer replacement filters to maintain the VZN system more than makes up for the slightly higher initial purchase price of the unit.

Not all water filtration systems are created equal. Today's foodservice operators have several types of systems to consider:

Mechanical

Mechanical filters physically strain solids and particulates as the water flows through. This category can further be divided by filtration type, including sediment filtration, microfiltration and ultrafiltration—each distinguished by pore size and the different kinds of media filtered.

Chemical

With this method, carbon filters are used to reduce taste and odor in water. Chlorine and chloramine come into contact with the carbon, reducing the chlorine and chloramine ions, which contribute to taste and corrosion issues.

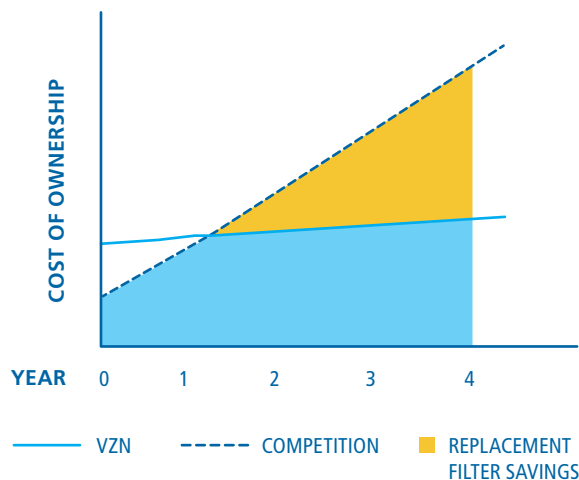

Ion Exchange

This method can be used to reduce the total hardness of water. Water softening involves the ion exchange resin replacing magnesium and calcium ions with sodium (or potassium) ions. Another method for reducing carbonate hardness is through replacing calcium ions with hydrogen ions.

Reverse Osmosis

Reverse osmosis is used in applications to control Total Dissolved Solids (TDS) levels in water. These systems force water, under pressure, through a semipermeable membrane, effectively removing dissolved minerals, including salts.

/// Cost Savings Over Time

Systems tested and certified by NSF International against NSF/ANSI:
 Standard No. 42: Aesthetic Effects Nominal Particulate Reduction Class I.
 Standard No. 53: Health Effects Cyst Reduction Turbidity Reduction as verified and substantiated by test data.

VZN-521H

VZN Series

Experience the benefits of premium water filtration without the constant costs of maintenance and cartridge replacement with the VZN series of ultrafiltration systems. The VZN series ensures premium quality water through a two-phase process. Water flows through the self-cleaning ultrafilter to substantially reduce particles prior to taste and odor reduction and, if applicable, scale reduction. This ensures consistent, high-quality ingredient water at a low operating cost, providing a significant quality upgrade to any beverage portfolio.

VZN-541HC

VZN Series With Chloramine Reduction

Some municipalities now add chloramines into their distribution systems in place of chlorine to disinfect water supplies. A combination of chlorine and ammonia, chloramines provide long-lasting protection without the risk of disinfectant byproducts. However, foodservice operations will want to remove chloramines from the ingredient water due to the distinct off tastes, odors, and corrosion these chemicals cause. The VZN chloramine series features a specially designed, activated carbon cartridge to remove chloramines from the water. This cartridge follows the self-cleaning ultrafilter in series and ensures premium quality water is delivered to the operation's beverage portfolio.

DMS-500

Reverse Osmosis Systems

Reverse Osmosis (RO) systems deliver high-quality water when Total Dissolved Solids (TDS) levels are too high, kitchen equipment water specifications need to be achieved (combi-ovens and steamers), or a recipe calls for a specific TDS level. The built-in blend valve allows users to dial in the needed TDS for their application. For best results, install the RO system downstream from a VZN ultrafiltration system, which protects the RO system by reducing particulates and tastes and odors. Select the appropriate tank below to store filtered water for periods of high demand.

Model & Mfg. No.	Max Water Production	Inlet	Outlet	Width	Depth	Height

UFL-510,520,540

UFL Series

The UFL series uses a self-cleaning .015 micron ultrafiltration cartridge to significantly reduce the number of particles in water. The self-cleaning ability extends the life of the cartridge and allows the system to operate with little user intervention. This system is available in several sizes to meet various flow rates. The Flush Tank Kit (P/N 7000472, see page 38) is highly recommended to enhance the backflush capability and extend the life of the cartridge.

HRS-200

/// Hardness Reduction System (HRS)

The HRS-200 system is an advanced hardness reduction system for espresso-based coffee and steam equipment. It utilizes a five-step process to remove scale-forming ions to ensure equipment is protected from lime scale buildup. This system also allows customers to specify the level of hardness reduction, optimizing both hot beverage quality and equipment performance while mitigating service issues and costs. For the best results, the HRS-200 system should be installed downstream from a VZN ultrafiltration system, which substantially reduces sediment, particulates, and tastes and odors. Includes cartridge, cartridge head, bracket, carbonate hardness test, flush valve, and fittings.

/// TAC Series

TAC systems improve the quality of water by addressing scale formation. These systems use a unique technology to convert dissolved hardness minerals into harmless, inactive microscopic crystals. These crystals are relatively insoluble, effectively isolated from the water chemistry and anything the water contacts. The TAC system should be installed upstream of equipment that uses hot water. Includes housing, mounting bracket, and filter wrench.

/// Hot Water Softener

Cleaning dishes is a necessity for any operation serving food or drinks. However hard water unsightly spots and deposits can make your dishes appear just as dirty after cleaning as they were to begin with. An Antunes Hot Water Softener can reduce this problem and ensure that your equipment has no scale build-up. Ideal for use with warewashers and dishwashers, the hot water softener is a compact and convenient solution that can easily handle the hot water that your equipment requires.

Name	Mfg. No.	Description	For Use With	
C-410 Carbon Cartridge	7000840	Includes O-Ring and Carbon Cartridge.	VZN-411V	\$
C-420 Carbon Cartridge	7000669	Carbon Replacement Kit includes O-Ring and Carbon Cartridge. Two kits required for TAP-442 and GAP-442 systems.	Carbon System, CAP-422i, CAP-422s, GAP-421, GAP-442, TAP-421, TAP-442, VZN-421H, VZN-421H-T5, VZN-441H, VZN-441H-T5, VZN-441V, and VZN-441V-T5	
CC-420 Chloramine Cartridge	7000762	Includes O-Ring, and Chloramine Cartridge. Two kits required for TAP-442 and GAP-442 systems.	CC-420 Chloramine System, VZN-421HC, VZN-421HC-T5, VZN-441HC, VZN-441HC-T5, VZN-441VC, and VZN-441VC-T5	\$
CA-420 Antimicrobial Cartridge	7000893	Includes O-Ring and Antimicrobial Cartridge. Two kits required for TAP-442 and GAP-442 systems.	VZN-421H, VZN-421H-T5, VZN-441H, VZN-441H-T5, VZN-441V, and VZN-441V-T5	
C-420 Extended Carbon Cartridge	7000982	Includes O-Rings and Extended Life Carbon Cartridge	VZN-441VE	\$
L-410 Ultrafilter Cartridge	7000839	Includes parts and instructions required for replacement in addition to one O-Ring Replacement Kit (P/N 7000413).	UFL-410 and VZN-411V	
L-420 Ultrafilter Cartridge	7000411	Includes parts and instructions required for replacement in addition to one O-Ring Replacement Kit (P/N 7000413).	CAP-422i, CAP-422s, GAP-420, GAP-421, TAP-420, TAP-421, UFL-420, VZN-420H, VZN-421H, and VZN-421H-T5	
L-440 Ultrafilter Cartridge	7000412	Includes parts and instructions required for replacement in addition to one O-Ring Replacement Kit (P/N 7000413).	GAP-440, GAP-442, TAP-440, TAP-442, UFL-440, VZN-440H, VZN-441H, VZN-441H-T5, VZN-441V, and VZN-441V-T5	
TAC-01 Cartridge	7000708	The TAC-01 Cartridge improves the quality of water by addressing scale issues on hot water applications.	TAC-01	
TAC-02 Cartridge	7000716	The TAC-02 Cartridge improves the quality of water by addressing scale issues on hot water applications.	TAC-02	
TAC-05 Cartridge	7000554	The TAC-05 Cartridge improves the quality of water by addressing scale issues on hot water applications.	CAP-422i, CAP-422s, TAC-05, VZN-421H-T5, VZN-421HC-T5, VZN-441H-T5, VZN-441HC-T5, VZN-441V-T5, and VZN-441VC-T5	
SI-XL Cartridge	7000540	The Scale Inhibitor Element Kit is used to replace the Scale Stick.	SI-XL	
HRS-200 Cartridge	7000967	Replacement cartridge for HRS-200 System.	HRS-200	
F-1010 Cartridge	7100040	Replacement cartridge for PF-10 Prefilter System. Includes parts and instructions required for replacement.	PF-10	
F-2010 Cartridge	7100041	Replacement cartridge for PF-20 Prefilter System. Includes parts and instructions required for replacement.	PF-20	
DMS-500 Carbon Filter	7001849	Replacement carbon cartridge (single pack). Two are required.	DMS-500	
DMS Calcium Filter	7001850	Replacement calcium cartridge (single pack). One is required.	DMS-500	
DMS-500 RO Membrane	7001851	Replacement RO membrane (single pack). One is required.	DMS-500	
DMS-800 RO Membrane	7001945	Includes one replacement reverse osmosis membrane.	DMS-800	
DMS-800 Filter	7001946	Includes one 20 micron replacement filter.	DMS-800	
DMS-800 Carbon Filter	7001947	Includes one replacement carbon filter.	DMS-800	
DMS-1500 RO Membrane	7001842	Includes one replacement reverse osmosis membrane.	DMS-1500	
DMS-1500 Filter Service Kit	7001843	Includes prefilter, postfilter, and o-rings.	DMS-1500	

/// Additional Technologies

Name	Mfg. No.	Description	
Brine Seal Kit	7000751	The Brine Seal Kit is specially designed for the CAP, GAP, TAP, UFL and VZN systems to assist in cleaning the ultrafilter. Includes Brine Seal Spring and Brine Seal O-Ring. Note: Can only be used for the UFL-400 and VZN-400 series, not the UFL-500 and VZN-500 series.	
5-in-1 Water Test Kit	7000750	The 5-in-1 Water Test Kit includes 50 test strips that measure Total Hardness in grains per gallon, the Total Chlorine in parts per million (ppm), the Free Chlorine in ppm, the Total Alkalinity in ppm and the pH of the water. These strips also help determine if a TAC cartridge is suggested (if the Total Hardness is at or above 7 grains per gallon).	
Strainer Kit	7000519	The Strainer Kit is specially designed for the CAP, GAP, TAP, UFL, and VZN systems to ensure that larger particles do not come into contact with the membrane. The strainer is designed to remove particles larger than 80 mesh (178 micron). Recommended for surface and well water applications.	
Flush Tank Kit	7000472	The Flush Tank Kit comes with a 2.1 gallon (7.9 liter) tank, saddle clamp, elbow, three adapters, six feet of tubing, and hose clamps. Recommended for all UFL applications.	
O-Ring Replacement Kit	7000413	The O-Ring Replacement Kit includes O-rings for the end cap and cartridge on an ultrafiltration system. O-rings included in this kit are for the VZN-400 Series systems only.	
Backwashing Prefilter	7000832	The Backwashing Prefilter is designed for high-performance silt, sediment, and turbidity reduction. Its unique properties allow it to provide increased results at a low cost, making it ideal for nearly every cold-water application.	
14 Gallon (53 Liter) Surge Tank	7000828	Provide any system with a backup supply of 14 gallons (53 liters) of filtered water in order to handle periods of high volume or demand. Easy to install within any system. Tank has a height of 22" (59 cm) and a diameter of 16" (41 cm).	
44 Gallon (166.6 Liter) Surge Tank	7000829	Provide any system with a backup supply of 44 gallons (166.6 liters) of filtered water in order to handle periods of high volume or demand. Easy to install within any system. Tank has a height of 36" (91 cm) and a diameter of 21" (53 cm).	
85 Gallon (321.8 Liter) Surge Tank	7000830	Provide any system with a backup supply of 85 gallons (321.8 liters) of filtered water in order to handle periods of high volume or demand. Easy to install within any system. Tank has a height of 44 1/2" (113 cm) and a diameter of 26" (66 cm).	
Water Meter Kit	7001223	In-line water meter allows monitoring of total water usage.	
VZN Drain Tube Kit	7000980	Kit includes fittings, clamp, and tubing to backflush the VZN to a drain.	
Water Sample Kit	7002105	Free sample kit to send water samples to Antunes for water quality analysis.	FREE
VZN Extension Cable	7001999	20-foot extension cord to power VZN system.	
VZN Ultrafilter Housing Retrofit Kit	7002139	The VZN Ultrafilter Housing Retrofit Kit is designed for VZN-421H, VZN-421H-T5, VZN-421HC, and VZN-421HC-T5. Kit includes stainless steel housing, O-rings, endcaps, and clamps.	
VZN Ultrafilter Housing Retrofit Kit	7002140	The VZN Ultrafilter Housing Retrofit Kit is designed for VZN-441V, VZN-441V-T5, VZN-441VC, and VZN-441VC-T5. Kit includes stainless steel housing, O-rings, endcaps, and clamps.	
VZN Ultrafilter Housing Retrofit Kit	7002141	The VZN Ultrafilter Housing Retrofit Kit is designed for VZN-441VE. Kit includes stainless steel housing, O-rings, endcaps, and clamps.	
VZN Ultrafilter Housing Retrofit Kit	7002142	The VZN Ultrafilter Housing Retrofit Kit is designed for VZN-441H, VZN-441H-T5, VZN-441HC, and VZN-441HC-T5. Kit includes stainless steel housing, O-rings, endcaps, and clamps	
VZN Ultrafilter Housing Retrofit Kit	7002143	The VZN Ultrafilter Housing Retrofit Kit is designed for VZN-411V. Kit includes stainless steel housing, O-rings, endcaps, and clamps.	
VZN Bypass Kit	7002201	The VZN Bypass is designed for VZN-511V, VZN-521H, VZN-541VE, VZN-541H, VZN-541V, VZN-521HC, VZN-541HC, and VZN-541VC. Kit includes hose, adaptors, unions, ball valves, and fittings.	
VZN Bypass Kit	7002271	The VZN Bypass is designed for VZN-520H and VZN-540H. Kit includes hose, adaptors, unions, ball valves, and fittings.	
VZN Bypass Kit	7002272	The VZN Bypass is designed for VZN-521H-T5, VZN-541H-T5, VZN-541V-T5, VZN-521HC-T5, VZN-541HC-T5, and VZN-541VC-T5. Kit includes hose, adaptors, unions, ball valves, and fittings.	

TERMS OF SALE

All orders are subject to acceptance by Antunes. To ensure prompt shipment, always order by catalog model number.

Upon credit approval, terms shall be net thirty (30) days. Accounts exceeding thirty days are subject to a service charge of 1.5% per month on the unpaid balance of the invoice.

Shipping weights indicated in this price schedule are approximate and many vary depending upon accessories delivered with the order. All shipments are FOB our factory, Carol Stream, IL, USA.

Enclosed electrical specifications are standard. If electrical requirements are different from standard, add 5% to the equipment cost.

All amounts quoted in this price list are in U.S. dollars. Payment in any other currency will not be accepted.

If shipment is lost or damaged in transit the purchaser should make a claim directly upon the carrier. Careful inspection should be made of the shipment as soon as it arrives and visible damage should be noted upon the carrier's receipt. All merchandise must be unpacked and inspected within ten (10) days after receipt. Damage should be reported to the carrier within that period. All boxes and packing will be required for inspection on damaged goods claims.

No equipment may be returned without an authorized return number. Returned merchandise is subject to a restocking charge plus charges for any necessary repairs to place equipment in resalable condition.

Returned goods must be shipped prepaid.

15% Restocking Charge on Returned Merchandise.

Prices quoted do not include federal, foreign, excise, municipal, or other sales or use taxes. All such taxes are the responsibility of the purchaser.

antunes.com

Antunes delivers a complete range of countertop cooking equipment and water treatment solutions to foodservice operations around the world. Learn more about Antunes and its complete product catalog at antunes.com.
